

NOW IS THE TIME TO ACT

Prior to the Deregulation Act of 1978, the Civil Aeronautics Board (CAB) regulated Airline ticket pricing and landing slots were also regulated. During this time, the Industrial Unions fared equally well since the competition was controlled by the Federal Government Agency (CAB).

Since the Deregulation Act of 1978 was enacted, ALL Unions in the Airline Industry have suffered Concessions, Layoffs, and Outsourcing of work, Bankruptcies, Liquidations, and loss of Pension Benefits.

Now the Airline Industry is consolidated into 3 massive International Carriers and Deregulation has ran its course, and the Airline Industry has entered into a new chapter!

The debate isn't about the past, because that cannot be changed.
The debate is about going forward working for profitable Airlines what representation is best for your profession.

The Real Question is:

Why wouldn't the Mechanic and Related enjoy better Union Representation from a Craft Specific Union like the Pilots and Flight Attendants have? Do we want a Union where every thought of every second of every day is laser focused on this profession? Or do we want to stick with the "ground worker" group where thought focus and dues money is spent on multiple work groups, and industries outside the Airline Industry like City Transit Systems and Railroads?

If you agree that a Craft Union is the better choice, then our choices are limited.
AMFA is our best chance at having craft specific Union Representation.

Why does everyone dilute the debate into the ugly Industry past?
Let's move forward and recover from the years of struggles.
